4) Commentary on Government's November 2021 Retail Sales (in value and in volume)

- a. The total Retail Sales Value (RSV) registered an increase of 7.1% for the month of November, as the spending sentiment remained positive due to the electronic consumption voucher scheme.
- b. For the first eleven months of 2021 taken together, the RSV increased by 8.3%, compared with the same period last year, which is mainly due to the low base for comparison in 2020.
- c. Amongst all categories, the RSV of “Other consumer goods, not elsewhere classified ” registered the most significant increase at 25.2% in November 2021 over a year earlier, followed by “Jewellery, watches and clocks, and valuable gifts” at 14.4%.
- d. On the other hand, the RSV of “Fish, livestock and poultry, fresh or frozen” decreased by 14.6% in November 2021 over a year earlier, followed by “Supermarkets” which dropped by 3.2%.

5) Sales Forecast for 2022 Chinese New Year (CNY)

- a. Provided that the local epidemic situation remains stable, the Association expects the RSV during the CNY would register positive growth, however, the growth rate might be lower than that of during the Christmas period.
- b. Despite the positive factor of citizens staying in Hong Kong during the CNY, members of the Association express concerns over the latest epidemic situation in view of the emergence of omicron variant in the community.
